GitHub • Portfolio

I am a Front-End Developer with 3.5 years of experience and strong proficiency in JavaScript (ES6) and TypeScript. I have a solid understanding of data structures and algorithms, which I apply to write clean, efficient, and optimized code.

I specialize in building scalable, high-performance web applications using React.js and Next.js 15 (with SSR & SSG). I have extensive experience in state management using Redux Toolkit, Context API, and Zustand, enabling me to handle complex application states effectively.

My front-end toolkit includes Tailwind CSS, SASS, Framer Motion, and GSAP for creating dynamic and responsive user interfaces. I apply performance optimization techniques such as lazy loading, code splitting, and implement secure authentication using JWT and bcrypt.

Additionally, I utilize React Query and Redis for caching, and write testable code using Jest. I also have backend experience with Node.js, and follow modern development workflows with Git and GitHub.

Projects

E-learning Platform (Repo) • ↗

A scalable and maintainable e-learning platform built with Next.js and modern React. It features user authentication, course and instructor management, personalized dashboards, account settings, internationalization, theming (light/dark mode), and a library of reusable UI components — all designed to provide a smooth and flexible learning experience.

Quran Kareem • ↗

A modern Quran web app built with React, TypeScript, and Vite. It includes Arabic text with translation, tafsir popups, ayah search, auto-scroll, font size control, prayer times, and azkar. The app has a modular, maintainable codebase with a clean UI and responsive design.

Food Website • ↗

An animated, smooth-transition website for food-related content, focused on engaging UI/UX

Dapos (SA) Marketing Website • ↗

An interactive marketing website with engaging animations to boost brand presentation

Movies Website • ↗

Developed a movie listing application

Facebook Clone • ↗

Built a responsive Facebook clone with full state management

Education

Student at Cairo, Cairo, Egypt

January 2020 - Present

Grade: 2

Employment History

Front End Developer at Khamsat Platform, Cairo, Egypt

Skills

Front End Skills: JavaScript (ES6), TypeScript, React.js, Next.js 15 (SSR & SSG), Redux Toolkit, Context API, Zustand, React Query, Tailwind CSS, SASS, Shadcn UI, Framer Motion, GSAP, Performance Optimization (Code Splitting, Lazy Loading), JWT, bcrypt, Jest, Git & GitHub

Backend Skills: Node.js, RESTful APIs, Redis (Caching), JWT, bcrypt (Auth), Express.js, Next.js Route Handlers
